

Insp3ct0r

For this challenge i wanted to inspect the page since the actual challenge is called inspector so i decide to use that then after that i decided to go through the scripts and i looked through them one time and then i saw in comments it gave me parts of the flag in different files for example the html file gave me the $\frac{1}{3}$ of the flag, etc. Then I continued and found more, then I pieced them together and submitted, and I got picoCTF{tru3_d3t3ct1ve_0r_ju5t_lucky?302945a7} as my answer.
